CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the writer presents conclusion and suggestion of this study. The conclusion is done based on the result of data analysis and discussion on chapter IV that is line with the problem statement. The suggestion is done based on the conclusion, which is gained from the result of the analysis and the discussion.

5.1 Conclusion

Based on the result of data analysis, the writer can concludes:

1. The application of jigsaw technique is effective to improve reading ability of the tenth grade students of SMAN 5 Kupang in teaching reading.

2. The level of students reading ability is 85,26 and classified as "Good"

3. The result of students learning in individual can achieved. The analysi shows that, the completeness result of a high level students learning is 88 for it is only from (twenty one students) and the low level is 55 (one student). If the result of student learning compare with the minimum score given by Ministry of Education (65) and the minimum score in SMAN 5 Kupang (65).

4. The activities in learning are good in the aspect of paying attention and listen the explanation given by the teacher (71) and low activities make question (65). Then followed the other activities are finish the work and discuss with the other students in groups (67) and give respons and answer the questions in groups (67).

5.2 Suggestion

Based on the finding the writer would like to give the suggestion that the application of jigsaw technique is good in teaching reading, so it can be used by teacher of English in teaching reading.
