CHAPTER V

CONCLUSION AND SUGGESTION

This chapter is about conclusion and suggestion dealing with the result of data analysis as have been analyzed in chapter four.

5.1 Conclusion

After analyzing the data collected during the research, the writer tries to draw some conclusion:

1. Learning about the narrative text of experimental class and recounting text at class 11 of SMKN 2 Kupang went well. The learning process by using comic strips is applied in writing narrative for experimental and the traditional method is applied for the control class in writing recount text. in experiment class the average value is 16 while in the control class the average value is 12.5 lower than the experimental class.

2. Test the results of calculations using independent t-test samples and the results obtained are sig (2-tailed0 of 0.000 <0.05, which means that groups using comic strips are higher, therefore the result is H0 is rejected and Ha is accepted, the result comic strips were effective in teaching writing.

5.2 Suggestion

Although the result of the study showed that the teaching writing by using comic strip is effective to improve writing skill of the eleventh grade students of SMKN 2 Kupang, but there were still difficulties faced by students. Therefore, the writer would like to offer some suggestions as follows:

1. The English teacher of the researched school should pay attention to students need and characteristic by giving them comic strip to make them easier to learn English.

2. The English teacher should be more serious in helping the students to develop their writing skills in some aspects such as content, grammar and vocabulary of the sentence that they make. Also the used of google translate in class is not recommended because it can cause instant mentality from student and make them difficult to remember vocabulary.
