

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter presents the conclusion and the suggestion of the study. Conclusion goes in line with the problem statements and the objectives having been formulated in chapter one, theory in chapter two, methods and techniques of the data analysis applied in chapter three and the result of the data having been found in chapter four.

#### **5.1 Conclusion**

Reduplication in Larantuka Malay is very productive and very wide. There are several types of reduplication in Larantuka Malay that occur in all classes of words, ranging from nouns, verbs, adjectives, numbers, and pre-categorials. There are also various patterns of reduplication, namely full reduplication, changes phoneme in consonants, changes phoneme in vowels, and affixes.

#### **5.2 Suggestion**

Larantuka Malay language is very interesting to research, the writer has also only researched part of it. The writer suggests that later other writers will investigate other aspects of Malay language, starting from research on affixation, compound, syntax and also culture. The writer includes pre categorials in reduplication, because up to now the writer has not found any source discussing about pre categorials.
