

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

The result demonstrates students' perception on the use of YouTube video in improving their speaking skills are highly effective. Most of the students agree that YouTube Videos help them guess the meaning of unfamiliar words, make them better understand the material. They agreed that YouTube Videos help them increase the number of words, allow the students to increase the ideas while speaking, help them understand the material being delivered, also they agree that their pronunciation is improved when they learn via YouTube, it can be seen in the result of the questionnaire section 2.

The findings also demonstrate that YouTube videos allow the students to use appropriate vocabulary and correct grammatical forms. On the other hand, YouTube video is a beneficial tool for language learning, make learning activities are very interesting and motivating, help them better understand the lesson, can learn faster and better, and they feel more comfortable using YouTube to learn English.

5.2. Suggestion

This study only reveals the students' perceptions through a questionnaire and no in-depth research using interviews with respondents. It is hoped that further researcher can improve this research by collecting the data through questionnaire and interview. Besides that, this study can be used as a reference for future researcher. Also, it will give inspirations or additional meaningful information in conducting the future research related to the media in teaching speaking. This research is expected to be useful for English teacher to select the appropriate media for students in learning speaking.
