

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

The discussion the present classroom action study which deal with the effectiveness of audio visual media in improving students listening ability of tenth grade students of SMA Negeri 1 Kupang could be concluded in this chapter. Some practical suggestion in reference to establish research findings were also recommended in this chapter so that the findings of this study could really provide some benefits for the English teacher and the tenth grade students of SMA Negeri 1 Kupang in the school year 2014/2015.

#### **5.1. Conclusions**

Based on the findings explained in the previous chapter, the researcher concluded that the teaching listening through the effectiveness of audio visual media could improve listening ability achievement of the tenth grade students of SMA Negeri 1 Kupang in the school year 2014/2015. The application of this media also improved the students' motivation in learning listening. Their learning motivation effectively led them to be better achievement. In teaching listening through Audio Visual Media, students got much support to expand their listening ability. When the media was applied, a relaxed classroom atmosphere was created. In order to get those objective fulfilled, the researcher concluded that a classroom action research design by directly teaching the students in the classroom. It was conducted in two cycle. The result of the analysis shows that the value  $X$  is 51.75,  $Y_1$  is 73.25 and  $Y_2$  is 82. This means that, the score of post test is higher than pre

test. By looking at the result of obtained the writer may conclude that teaching Listening by using Audio Visual Media is effective and interesting way that can be applied in teaching listening because there is significantly improvement of students listening ability after teaching using Audio Visual Media.

## **5.2. Suggestions**

Based on the result of the study that have been stated on the conclusion above then some suggestions were put forward by the researcher as the following;

### **1. For English Teacher**

The English teacher is suggested to use Audio Visual Media in teaching English especially teaching listening for young learners, since it could improve the students' ability, motivation and enjoyment in learning process.

### **2. For the students**

Students who still have low achievement in listening ability items were suggested to be more concentrate in learning and be active in the classroom when the teacher was being teaching using Audio Visual Media. The students also had to practice their knowledge more than before because language would be mastered by practicing in our daily activities.

### **3. For the others**

The data of this study is good. So the writer suggest for those who want to used CAR as their method in research they must use two cycle to make his / her study complete.
